She graduated in 1990 in Industrial Chemistry at the Complutense University of Madrid (UCM) and received the PhD on Chemical Engineering in April 1994. In 1991 she started to work at the Chemical Engineering Department of the UCM: 1991-1996 as Assistant Professor; 1996-2002 as Associated Professor and since 2002 she is Professor.

In 1990 she founded her own company "Ecomanagement". During two years she was the Technical Manager. Since 1993 she works full time for the Complutense University. Her research areas are related to Industrial Processes and Environmental Sciences. She has published 90 research papers, 120 papers in conferences (55 invited), she has collaborated in 11 books, 4 patents and in the organisation of 15 international conferences. She has participated in 22 European projects (14 as responsible) and in 47 industrial projects. She has received the "IIBCC 2008 Excellence Award in Recognition of Outstanding Research on Inorganic Bonded Composites".

She is Vice-president of the European Fibre and Paper Research Organisations (EFPRO). She is board member of the European Water Partnership and she is collaborating in the groups of Sustainable Water Management, Water and Energy and Climate Change. She participated in the elaboration of the SRA of the FTP (co-leader of paper value chain) and she is member of the Scientific Council and of the WG of Education. She participated in the elaboration of the Vision Document and the SRA of the WSSTP. She is the COST Spanish representative for the FPS domain and member of the Core Group and member of the Research Committee of TAPPI.
